

**Integrated
Verification Systems**

Eligibility Verification... Made Easy!

AVA is your Automated Verification Application. A very helpful data robot that automatically collects eligibility information from PROMISE™ every day and builds your data warehouse!

- ✓ **AVA** carries the heavy load of daily eligibility verification, eliminating the labor-intensive manual process.
- ✓ **AVA** identifies prospective eligibility end dates, providing advance notification and the decision support that promotes quality.
- ✓ **AVA** will save you thousands of dollars per year in by reducing verification FTEs and non-billable services due to lost eligibility.

Automated Member Eligibility Verification Exclusively Designed for Pennsylvania PROMISE™

Using your approved provider credentials, **AVA** automatically queries PROMISE™ for each of your members. Members are easily loaded by a spreadsheet template accommodating any EHR. **AVA** also:

- builds a data warehouse and displays historical PROMISE™ data in a useful data dashboard.
- helps you address eligibility issues prior to loss, or immediately after to prevent unbillable services.
- also provides eligibility documentation to support claims submission.
