
Opportunity to Guide the Future of Telehealth From National Council

NATIONAL COUNCIL FOR BEHAVIORAL HEALTH

Dear National Council Member:

You have the opportunity to guide the future of telehealth. But to do it, we need just five minutes of your time to complete a [short survey](#).

One of the most dramatic changes brought about by the COVID-19 pandemic has been an unprecedented growth in telehealth services. We must ensure that policy evolves in a way that will advance quality and patient experience and establish a stable, long-term environment that fosters the growth and integration of remote services.

The multi-stakeholder Taskforce on Telehealth Policy is seeking the input of a breadth of telehealth stakeholders, including National Council members, as they create recommendations for policymakers on the safe, effective and efficient adoption of telehealth.

Help direct meaningful change that responds to the needs of those of us on the frontlines and the individuals and families we serve.

I urge you to invest a few minutes to complete this [brief telehealth survey](#) by Wednesday, July 8.

Your input is critical to the success of this endeavor to ensure that the more than 10 million adults, children and families living with mental illnesses and addictions receive the care they deserve. But this isn't a one-way conversation. Please share your responses to the survey with us at Policy2@TheNationalCouncil.org.

Thank you for your input and for all you do every day!
