D&A Members: Complete Survey on General/Professional Liability Insurance Coverage

Several drug and alcohol members have indicated that the costs of general and professional liability insurance coverage have been swiftly rising, and that many carriers are refusing to write policies for behavioral healthcare treatment providers; therefore, RCPA has created a brief [member survey](#) to gather information about the extent of this problem. If it is widespread and significant, RCPA and its members will be in a better place to approach state regulators to assist in remedying this problem. We need your help in responding to this [brief survey](#), so we can understand the potential impacts on membership with a broader set of providers.

Please complete the survey by close of business on Wednesday, September 16. Thank you for your assistance.
