

Substance Use Disorder: Screening, Brief Intervention, and Referral to Treatment (SBIRT) Training and Implementation Series

Presented by The Department of Drug and Alcohol Programs and the University of Pittsburgh's Program Evaluation and Research Unit in the School of Pharmacy

Healthcare Professionals and Medical/Healthcare Students are you interested in:

- Supporting early intervention and treatment services for persons with substance use disorder and those at risk for developing these disorders?
- Identifying patient risk level for substance use disorders through evidence-based screening tools?
- How a 5-minute discussion can increase a patient's understanding of risk that leads to a desired behavior change?
- How integrated care coordination can support a patient's road to recovery?
- How to effectively and efficiently implement strategies and best practices with a team into your current workflow?

The Department of Drug and Alcohol Programs and the University of Pittsburgh's Program Evaluation and Research Unit in the School of Pharmacy are leading a series of trainings to promote the practice of SBIRT (Screening, Brief Intervention, and Referral to Treatment) throughout 2021 to provide health care professionals and students with the opportunity to learn about the evidence-based practice and how to implement innovative practices into the current workflow.

Participants will receive continuing education credits upon completion of the following:

- Part 1: Online, Self-Paced SBIRT Curriculum (6 hours)
- Part 2: Virtual Interactive Skill-Building Seminar (3 hours)
- Part 3: Post-Series Assessment

The Online, Self-Paced SBIRT Curriculum must be completed before participating in the Virtual Interactive Skill-Building Seminar.

Registration is FREE and will open early 2021.
