Unemployment Compensation (UC) fraud is on the rise at national, state, and local levels since the onset of the COVID-19 pandemic.

The far-reaching effects impact rates charged to employers, claimants in need of assistance, and taxpayers who contribute to the fund. Employers play a critical role in the UC process of ensuring proper payments and reducing overpayments.

This timely virtual information session will provide employers with the information they need to identify a fraudulent claim and how to report instances of potential fraud quickly on the UC website using the Employer Dashboard.
