

On behalf of the Pennsylvania's Department of Health, Department of Human Services and Emergency Management Agency, the Jewish Healthcare Foundation invites you to join the following webinar:

Providing COVID-19 Therapeutics: Your Questions, Answered

July 12, 2022

4:00 pm – 5:00 pm

Outpatient COVID-19 treatment and preventive therapies can improve patient outcomes and save lives. Oral antivirals (Paxlovid, Lagevrio) and monoclonal antibodies for pre-exposure prophylaxis (Evusheld) are now widely available in Pennsylvania, but more can be done to improve awareness, access, and equity. This session is intended for providers and facility administrators and will cover why, when, and how to prescribe and access outpatient COVID-19 treatment and preventive therapies. The session will include presentations by leaders and clinicians from DOH, DHS, and additional organizations, as well provide an opportunity for Q&A.

Please forward the webinar invite along to any other relevant stakeholders in your network. For those unable to attend live, a recording of the session will be made available.
