

## September Supplemental Document

### Data provided at the October 4, 2022 MLTSS Subcommittee Meeting

Related to Individuals Impacted by the PHE, an audience member asked, what are the number of individuals losing services per MCO? Jermayn said he would follow up on this item.

The DHS unwinding leads provided a data report with the CHC population broken out by MCO as of August 18, 2022.

Before going into the data from the August 18<sup>th</sup> report, we'd like to cover some of the topline changes between the April 17<sup>th</sup> numbers that we provided at the September meeting and the August 18<sup>th</sup> numbers being provided today.

Between the April 17, 2022 report and the August 18, 2022 report:

- There was an increase of 4,312 individuals in CHC maintained despite not meeting eligibility criteria

- There was an increase of 233 individuals in CHC with HCBS

- There was an increase of 334 individuals in CHC with facility code 36 indicating they were in a skilled nursing facility

- There was an increase of 3,745 NFI dual individuals

There was an increase of 2,209 individuals in CHC who had not completed the renewal process

- There was a decrease of 1,092 individuals in CHC with HCBS

- There was an increase of 908 individuals in CHC with facility code 36 indicating they were in a skilled nursing facility

- There was an increase of 2,393 NFI dual individuals

This is the information from the data report with the CHC Population broken out by MCO as of August 18, 2022:
