

PREVENTION, TRAINING & EDUCATION

In Collaboration with Jewish Family and Children's Services and in Recognition of FASD Awareness Month,
The Council of SEPA is Proud to Offer

Fetal Alcohol Spectrum Disorders (FASD)

Exploring the Physiological and Psychological Effects of Alcohol Exposure

Throughout Prenatal Development

Free Social Work CEU Credits Offered

Alcohol use continues to be a behavior that is normalized by many adults of child bearing age in the U.S. Despite the recommendations of no alcohol use during pregnancy, the CDC reports there could be up to 1 in 20 children being born with an FASD. Join us for a training that can help identify current challenges and resources to better support mental illnesses in individuals with FASD.

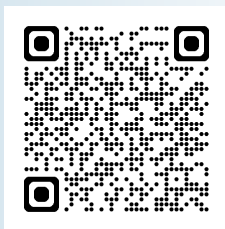

The Presenter:

David Fialko, BS, ICPS, NCTTS

Over the past 20+ years, David has provided a wide variety of counseling, intervention and prevention services to adolescent populations who were often diagnosed with co-occurring disorders. David's experience working with this population allows him to provide up-to-date and effective trainings regarding substance misuse and its impacts.

Topics covered will include:

- Neurological effects on the developing brain
- Behavioral impacts throughout life time
- Physiological effects on the developing fetus
- Understanding the "FASD spectrum umbrella"

Monday, September 23rd, 2024
1pm to 3:00 pm
