

Greetings,

We are inviting you to **participate in a brief 5-minute survey** aimed at understanding and promoting **value-based payment approaches for integrated behavioral health care**. Our target audience includes health systems, quality and administration professionals, primary and specialist care providers, and funding sources such as payers, policymakers, foundations, and grants. This survey seeks to provide insights into the current state of value-based care, identify existing gaps, and explore opportunities for better alignment between payment models and clinical practice. By defining integrated care and highlighting key models and challenges, we aim to foster meaningful collaboration and innovation in delivering comprehensive, patient-centered care. Your input will be invaluable in shaping strategies to improve health outcomes, patient engagement, and cost efficiency.

Thank you for your participation and contribution to this important initiative.

The results of the survey will be disseminated through the Collaborative Family Healthcare Association and the Value Based Care workgroup (CFHA; [www.cfha.net](http://www.cfha.net)) by winter of 2024.
