

Impact of Congressional Republicans' Health Care Cuts on Medicaid and SNAP in Pennsylvania

Background

This document provides information on the Medicaid and SNAP programs in Pennsylvania and offers a high-level analysis of the potential impacts of H.R. 1, Congressional Republicans' budget reconciliation bill, on Pennsylvania. As currently proposed, the legislation would kick over 300,000 Pennsylvanians off Medicaid, shift \$1 billion in food assistance costs from the federal government onto our state budget, and strain our hospitals, potentially leading to the closure of as many as 25 rural hospitals across Pennsylvania. The legislation would also add significant new IT and administrative burdens for Commonwealth agencies in the form of unfunded mandates from Washington.

Impact on Residents

The proposed changes are expected to reduce access to both health care and SNAP benefits, particularly for individuals with disabilities, older adults, and working families. Delays in enrollment, increased administrative hurdles, and the elimination of retroactive coverage would cause financial hardship and disruptions in care. Rural hospitals — half of which already operate at a loss —

would face unsustainable levels of uncompensated care, threatening access to emergency and critical services for rural Pennsylvanians.

Medicaid in Pennsylvania

Medicaid covers about 3 million people in Pennsylvania, or 23% of the state's population. In FY 2024–25, between provider assessments and state general funds, the Commonwealth contributed more than \$14 billion to the Medicaid program, which is matched by more than \$30 billion in federal funds.

Of the 3 million individuals receiving Medicaid:

- 750,000 have Medicaid coverage because of Medicaid Expansion;
- 1.3 million are children;
- 423,276 are individuals with a disability;
- 312,000 are older individuals (65+); and
- Almost 10,000 are veterans.

Every year, Medicaid in Pennsylvania covers:

- More than 175,000 Pennsylvanians who receive treatment for a substance use disorder;
- Over 200,000 people who receive treatment for diabetes;
- Nearly 44,000 seniors and people with disabilities in Pennsylvania who receive care in their home or community instead of in a nursing facility;
- More than 45,000 births across the Commonwealth; and
- More than 61,000 people who need treatment for heart failure.

As a result of H.R. 1, over 300,000 Pennsylvanians could be kicked off of Medicaid. A breakdown of Medicaid reductions by county is shown below.

To stay within limits created by any financial cuts to the Medicaid program, Pennsylvania and other states would likely be forced to make reductions in eligibility, benefits, and provider reimbursement rates. As a result, significant numbers of individuals could lose access to vital healthcare services. Individuals with complex medical needs, seniors, and people with disabilities could be particularly affected by cuts to necessary services.

The loss of vital health care services will likely result in:

- Increased utilization of uncompensated emergency department and inpatient services;
- Exacerbation of underlying conditions such as diabetes or heart conditions;
 and/or
- Delays in seeking care or treatment, leading to worsened conditions or advanced diagnoses.

Stagnant or reduced reimbursement rates would severely limit the state's ability to adequately fund care, potentially decreasing the pool of providers willing to participate in Medicaid. Restricted rates would be devastating to skilled nursing homes and hospitals, the latter of which will still be required to treat emergency patients, even if they lose Medicaid coverage. This impact will be particularly felt by rural hospitals. As a result of this increase in uncompensated care, the cost of private health insurance is also likely to rise.

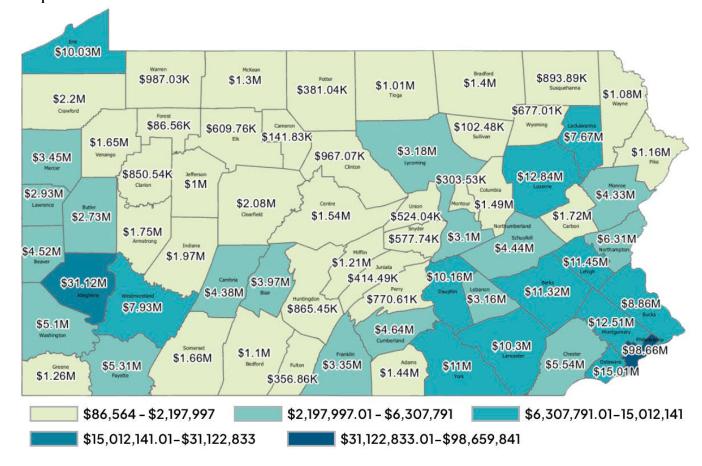

SNAP in Pennsylvania

The Supplemental Nutrition Assistance Program (SNAP) is a food assistance program that helps nearly 2 million Pennsylvanians — mostly children, older adults, or people with disabilities — buy groceries and feed their families each month.

SNAP benefits have a profound impact on the Commonwealth's economy. In December 2024, SNAP provided \$366,850,460 in federally funded food assistance benefits that support grocers, food retailers, and Pennsylvania's agricultural industry while also helping individuals and families put food on the table.

The United States Department of Agriculture's Economic Research Service found that for every \$1 billion issued in federal SNAP benefits, our economy grows by \$1.54 billion through job retention and creation and income for farms and other agricultural producers. This program is an important part of supporting a healthy economy for all Pennsylvanians in every county of our Commonwealth. Loss of SNAP benefits has been shown to correlate with increased costs in Pennsylvania's Medicaid program, particularly for individuals with diet sensitive conditions like diabetes, where loss of benefits led to an increase of Medicaid medical spending of \$263 per member/month.

As a result of H.R. 1, \$1 billion in food assistance costs shift from the federal government onto our state budget and result in at least 140,000 Pennsylvanians losing access to food assistance because of new red tape and reporting requirements.

New Unfunded Mandates from Washington

H.R. 1 also adds significant new burdens and mandates on states, without providing any new flexibility or support. These unfunded mandates would cost Pennsylvanians nearly \$60 million every year.

- Implementing 6-month redeterminations for the expansion population will require an increase of 500 staff. Costs for wages, benefits, and operating costs are approximately \$37 million per year. One-time IT costs are estimated at \$2.5 million.
- Implementing work reporting requirements for the expansion population will require an increase of 250 staff. Costs for wages, benefits, and operating costs are approximately \$18 million per year. One-time IT costs are estimated at \$4 million.

Potential Medicaid Coverage Loss by County

| County | Individuals | Medicaid | Potential |
|-----------|-------------|-----------|-----------|
| • | Receiving | Expansion | Medicaid |
| | Medicaid | | Reduction |
| STATEWIDE | 3,004,813 | 751,092 | -310,000 |
| Adams | 16,477 | 4,027 | -1,676 |
| Allegheny | 248,310 | 63,058 | -25,871 |
