

# Clarification for the 6100 Annual Incident Management (IM) Training Requirements

## ODP Announcement 25-069

### AUDIENCE:

### PURPOSE:

To announce

- A direct path to annual training requirements for IM and protective services for Providers and Supports Coordination Organizations (SCOs) as outlined in the Chapter 6100 Regulations.
- A new condensed IM training module that meets 6100.143 (c) (4) requirements.

### DISCUSSION:

To support Providers and SCOs in meeting both the Annual IM Training and the protective services requirements outlined in Chapter 6100 regulations, ODP has organized a streamlined IM training page on MyODP that will meet the [6100.143 \(c\) \(2\) and \(4\)](#) Annual training requirements.

The condensed module pulls out key components from the broader IM Training series available on MyODP and packages them into a focused resource designed to help organizations more easily identify and complete the trainings necessary to meet annual regulatory requirements. All staff are still required to take the Protective Services modules annually. While Providers and SCOs still have the option

to develop and deliver their own training, this condensed module serves as an accessible option for fulfilling the annual training requirements.

This module can be found on MyODP by navigating to the “topics” tab and clicking on “Incident and Risk Management” in the dropdown then clicking on Incident Management Annual training as pictured below, OR by the following link: [Incident Management Annual Training](#)
